### Morningstar ESG Risk Rating™

Out of 8,421 Global Equity Large Cap category funds as at 30 September 2025. Based on 100% of eligible corporate AUM and long positions only. The TM Navera Global Equity Strategy fund does not have a sustainability investment objective.

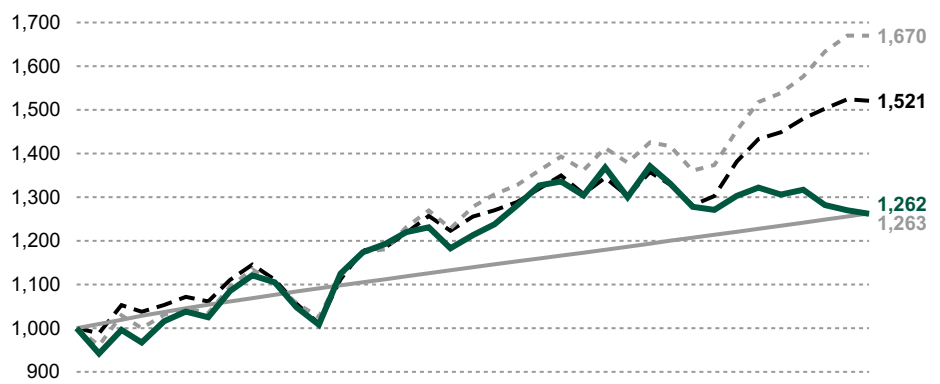

### Investment Objective and Approach

TM Navera Global Equity Strategy B USD Acc ("the Fund") aims to achieve a total return (through a combination of capital growth and income), net of fees, in excess of the OECD G7 Consumer Price Index plus 5% per annum, over five-year rolling periods. The Fund aims to achieve the investment objective by investing directly in a focused portfolio of between 25 and 40 equities on an unconstrained basis (ie: with no reference to an index or benchmark), representing an allocation to equities of between 80-100% of the Fund in normal market conditions.

The Fund's investment philosophy and strategy are centred on bottom-up stock selection supported by a rigorous in-house research process. The Fund considers long-term structural shifts taking place across the world and seeks to identify well-positioned companies using a combination of qualitative and quantitative measures focused on: industry tailwinds, sustainable competitive advantage, financial strength, and management's track record.

### Performance

Growth of \$1,000 investment, net of fees, since inception

Nov-22 Feb-23 May-23 Aug-23 Nov-23 Feb-24 May-24 Aug-24 Nov-24 Feb-25 May-25 Aug-25 Nov-25

— Fund — OECD G7 CPI + 5% - - MSCI AC World Equity Index (\$) -- IA Global Fund Universe

### Performance to 30 November 2025 (%)

	1 month	3 months	1 year	Since Fund Inception

### Important Information

#### Understanding the Factsheet

For all the details of the fund, please refer to the prospectus for the Fund available on [www.naverainvestment.com](http://www.naverainvestment.com).

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund.

#### Comparator Information

The OECD G7 Consumer Price Index combines the inflation rates for the inter-governmental forum known as the G7. This group consists of Canada, France, Germany, Italy, Japan, the United Kingdom and the United States.

The Fund uses the MSCI All Country World Index as a comparator benchmark against the wider equities markets and an investor may choose to use this benchmark to compare the returns achieved by the Fund against the performance of the assets in which the fund can invest. This comparator benchmark has been chosen taking account of the investment strategy of the Fund and the assets in which the Fund invests.

The Fund also uses the Investment Association Global peer group as a performance comparator which is a peer group which groups funds with a similar objective of investing at least 80% of their assets globally in equities. An investor may choose to use this peer group to compare the returns achieved by the Fund against other funds with a similar objective.
